**Video – A year on a farm**
Geography, Mathematics, Science, Technologies

1. What is the climate in Kalangadoo?

2. What is the difference between when the farmers first started farming?

3. What is the idea behind having a diverse ecosystem on a farm?

4. List 3 places the farm sells apples to?

5. What is involved in value adding?

6. What are the geese used for?

7. What are the chickens used for?

**Research:**
Investigate and report of any other type of farming that is diversifying their farming system. This could include a cropping or animal farm.

Have a think and record how either a wheat farmer or a sheep farmer could diversify their farm to achieve some of the same results as above?
