Video: Biomes that produce our food, industrial materials and fibre

Geography

1. In what climatic conditions is the farm?

2. What does being in a 'high rainfall area' allow the farmer to do?

3. Where are the crops grown?

4. Where are the livestock grazed?

5. What is the wool seen as? How could it be used?

6. What are some of the ideas that are suggested in being able to farm profitably in the future?
